

Memo from  
JOSHUA LEDERBERG

To: B.A.

AUG 28 1973

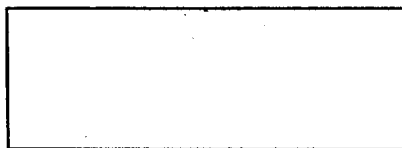

aging (your letter of 5/23)

I've been out of country; failed twice  
to reach you by phone. Please  
call me back after 9/12 if you  
wish. (415 3211200 x5801).

I am not working directly on  
aging, though we must regard this  
as a "genetic disease" and some  
aspects may be amenable to  
genetic therapies.

Enclosed some comments.

Sincerely,

PROFESSOR JOSHUA LEDERBERG  
Department of Genetics  
School of Medicine  
Stanford University  
Stanford, California 94305
